

# Annuals

True annuals grow from seed, bloom, set new seed, and die all in a single year. Many plants in this section are nonhardy (or “tender”) perennials that cannot survive the winter in Minnesota, so we treat them as annuals.

# Outdoor/Indoor Plants 🌿

Many tender perennials, shrubs, and trees can’t survive our Minnesota winters. Use them as colorful or tropical-looking annuals, or they can be brought indoors in fall. The plants in the Outdoor/Indoor section do well in containers either as houseplants ☼ or kept under lights in a cool room or basement.

Heights are given when possible, but often depend on the size of the container the plant is in and how many years it is over-wintered indoors. Some of these plants are large now or can grow quite large. Other tender plants are listed in the main Annuals section, Climbers, Miniatures & Succulents, or Unusual & Rare.

## A001 Angel’s Trumpet, Tropical *Brugmansia* Peach

Orange yellow flowers are 8” long and 6” wide where they flare out. Huge, dangling trumpets are usually sweetly scented. Blooming begins when the plant is close to full height, requiring regular feeding and some patience even though the plant grows fast. Prefers to be planted in the ground for the summer, then in a tub indoors to over-winter as a tender woody tropical bush. 60–72”h ○●☼ **\$44.00—2 gal. pot**

## Banana *Musa*

Give your garden or patio that tropical look. A banana plant will over-winter in a very sunny window or dormant in a cool, dark basement. Let us know if you get bananas. ○

**\$15.00—6” pot:**

A003 **Truly Tiny** ☼—The smallest variety, with edible 1–2” sweet bananas. Leaves are splashed with burgundy. Grow in a container, fertilize regularly, water well, keep warm, and provide lots of bright light when it’s indoors. 24”h by 48”w ☼

# Zero Waste 2025 Update

Each year, our commitment to running a Zero Waste effort at the plant sale continues to grow—just like our gardens. Our goal is to compost or recycle at least 90% of the waste generated at the plant sale.

The Minnesota State Fairgrounds has applauded our efforts as the rare event that

leaves the site as clean as (or better than) we found it. We started in 2023, expanded in 2024, and are continuing to refine in 2025.

Before and after the plant sale, we set up a system to collect and recycle waste from pallets and big shipments. During the sale, volunteers are at each station to help ensure proper sorting. We've worked with food vendors to get only recyclable or compostable cups, bowls, utensils, and plates. This year our intention is to support your own zero waste journey at home.

Stop by the Zero Waste tent for current information, links, and networking for waste management ideas in your own home and garden.

We'd love to see you there!  
—Debbie and Maggie

## Bring Your Own Box Raffle

Last year we launched the Bring Your Own Box Raffle, and it was so successful we're expanding it this year! While we get strawberry boxes donated, Friends School Plant Sale also purchases a large number of cardboard trays for our customers. Every container that you bring is one less we need to buy or gather from a grocery store. When you bring a container, you save our fundraiser money and help reduce waste.

### Enter the raffle to win prizes! One free ticket for each container:

Any container that you provide to carry your plants home earns you one ticket. Eligible containers include cardboard boxes, wagons, carts, reusable plastic crates, and more. If you bring it, we'll reward it with a ticket.

At the end of the sale, we'll draw raffle tickets and **five lucky winners will each get a pair of #1 wristbands for the 2026 sale.** These will get you and a friend into the very first entrance group on a day of your choice—no waiting in line!

### Get your tickets at the Zero Waste tent in the Garden Fair.

**Drop your tickets into a raffle box at the Zero Waste tent, near the checkout line entrance, or at the cashiers.**
